

NUMBER LINES - INTEGER ADDITION

Name _____

A positive integer can be represented by an arrow moving to the right.

A negative integer can be represented by an arrow moving to the left.

Show the number line model for each addition; find each sum.

$(+1) + (-1) =$

$(-1) + (+1) =$

$(+6) + (+2) =$

$(-6) + (-2) =$

$(+6) + (-2) =$

$(-6) + (+2) =$

$(-6) + (+6) =$

Integer Addition	Examples
When a positive number is added to a positive number, the sign of the answer is _____	
When a negative number is added to a negative number, the sign of the answer is _____	
If a positive number is added to a negative number, the sign of the answer is positive when _____ the sign of the answer is negative when _____ the answer is zero when _____
