

Rebecca Kachmor

Dr. Smirnova

ED 2601.02 Methods of Teaching for childhood Education

Learning Contract

I Rebecca Kachmor am a student in Dr. Smirnova's Class ED 2601.02, Methods of teaching for childhood Education. I have read the syllabus completely and I fully understand what is expected of me and I agree to do the following:

- 1) I understand that when there are group projects going on in the class I am to fully take part in the activities and discussions that are assigned to the group.
- 2) I am aware that there will be days in class when I am assigned a group and am expected to participate and cooperate with the others in my group.
- 3) I understand that each week I will be assigned different assignment in which I must complete.
- 4) I understand that I am expected to cooperate in activities that require a reflection or a critical thinking question about education.
- 5) I understand that I am to use WEB CT to submit all of my completed assignments.
- 6) I understand that when I am in front of the class presenting, that I am really having practice teaching others. I understand that I am to use this time as practice for when I become a teacher and am in the field.
- 7) I understand that when I grade my classmates on group work, that I am to be honest and fair.
- 8) I understand that I am to keep a journal of class readings/discussions and observations from field work.
- 9) I understand that for my midterm I am required to create a web quest with the help from my unit plan I completed in Basics.
- 10) I understand that I am required to complete 20 hrs of field work and I am expected to plan and teach 3-5 lessons in this elementary setting classroom.
- 11) I understand that I must submit my lessons on WEB CT and reflect on the teaching of my lesson and also be prepared to discuss my experience with that class.
- 12) I understand that I will have to complete and E-folio which will show my professionally growth as well as my understanding of the teaching process.
- 13) I accept the challenge that I will receive an "A" in this class and I understand that in order to do so I must follow the syllabus and complete all assignments and complete extra work along with putting more effort in everything I do.
- 14) I understand that this is a opportunity to really grow and learn.
